INNOVATIVE MATERIAL HANDLING SOLUTIONS

An experienced team offering top-quality products and exceptional service. a basket full of options available to our clients in need of lifting equipment, forklifts, forklift batteries, repairs, refurbishment, services, and maintenance. We are solution-driven to source and deliver, or if you need guidance on selecting the right equipment for your specific needs, Custom solutions to perfectly fit your needs.

ABOUT US

Willcorp Innovation
Material Handling Solutions

At Willcorp Innovation, we understand that delivering a product is just the beginning. We are committed to providing comprehensive solutions that simplify your operation and enhance your overall lifting experience. Here's how we go beyond just delivering a product: We serve our clients all over South Africa with dedicated partners in Johannesburg, Durban, Cape Town, and Nelspruit.

Customized Solutions: We believe that every business is unique, and one-size-fits-all solutions may not always meet your specific requirements. That's why we work closely with you to understand your operational challenges, workflow processes, and goals. Based on this understanding, we tailor our products and services to provide customized solutions that address your specific needs. **Consultative Approach:** Our team of experts is dedicated to providing consultation and guidance throughout your journey. We offer professional advice on the selection of the right equipment, configuration, and integration into your existing infrastructure. We take into account factors such as load capacity, space constraints, safety regulations, and budget considerations to ensure that the solution we deliver aligns perfectly with your operational requirements.

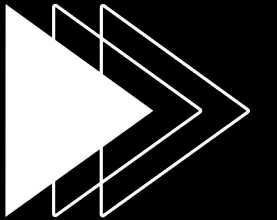

Training and Support: We believe that the successful implementation of our solutions goes hand in hand with proper training and ongoing support. Our team will provide comprehensive training to your staff on the operation, maintenance, and safety aspects of the equipment. We also offer efficient after-sales support, including maintenance services, spare parts availability, and technical assistance, to ensure that your operations run smoothly and efficiently.

Continuous Innovation: We are committed to staying at the forefront of technological advancements in the material handling industry. Our team continuously explores new technologies, trends, and best practices to enhance our solutions and provide you with the latest innovations. We strive to deliver cutting-edge products that not only meet your current needs but also future-proof your operations.

By delivering comprehensive solutions that simplify your operation and enhance your overall lifting experience, we aim to become your trusted partner in material handling. We are here to support you every step of the way, from initial consultation to ongoing maintenance and beyond. Let us help you streamline your operations and achieve your business goals.

DIESEL FORKLIFTS

we offer diesel-powered forklifts from 1 to 46 tons with various masts. In addition, they come in different engine capacities to suit every application and budget.

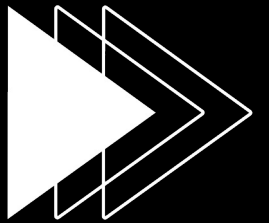

CHOOSING DIESEL-OPERATED FORKLIFTS

Diesel-operated forklifts are more durable and can handle heavier workloads with lower maintenance requirements. However, they have a higher noise factor and exhaust fumes. As a responsible diesel-powered forklift supplier, we know the pros and cons, ensuring you make an informed decision.

LITHIUM FORKLIFTS

With lower running costs, higher productivity, and emission-free operation it is no wonder electric forklifts are an attractive alternative for businesses.

CHOOSING LITHIUM FORKLIFTS

Electric forklifts with lithium-ion batteries are becoming more and more popular for businesses over traditional forklifts with lead-acid batteries due to the overall environmental and safety features; and longer overall operational life.

WAREHOUSING EQUIPMENT

CHOOSING LITHIUM FORKLIFTS

One of the key advantages of Heli warehousing equipment is its advanced ergonomic design. Heli understands the importance of operator comfort and safety, and their equipment reflects this commitment. Our product line-up includes forklifts, reach trucks, pallet trucks, stackers, etc.

COMBILIFT

Combilift is a specialist forklift & straddle carrier manufacturer producing a wide range of customised handling solutions, all of which are designed for the safety, space saving, and productive handling of long and bulky loads.

4-way Combilifts work as a counterbalance, sideloaders, and narrow-aisle forklifts. The Combi-SC (Straddle Carrier) is the most cost-effective solution for the handling of containers and oversized loads. With the ability to operate in very narrow aisles, VNA, in the warehouse – as narrow as 1.6m – the Aisle-Master articulated forklift increases and maximises storage capacity.

FORKLIFT TRAINING

We take great pride in providing top-tier training for all your forklift and health and safety needs. Our commitment to excellence is reflected in everything we do, from our highly experienced trainers to our exceptional client service. Whether you need basic instruction, ongoing certification, or refresher courses, we have the tools and resources to help you succeed.

We offer Renewal and Novice training for the following lifting machines:

Forklift

Reach Truck

Overhead Crane

Truck Mounted Crane

Mobile Crane

Order Picker

Power Pallet Truck

Aerial Platform

Telescopic Boom Handler

Skid Steer Loader

Front End Loader

HEALTH & SAFETY

We offer Renewal and Novice training for the following health and safety certifications:

Lockout Procedure Training

First Aid in the Workplace

Basic Fire Fighting

Health and Safety Representative

Incident Accident

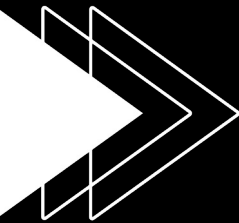

Risk Assessment

Working at Heights

Spill Response/Hazchem

Legal Liability

Emergency Preparedness and Response

WAREHOUSE RACKING

RACKING

Maximize Your Warehouse Efficiency with a Racking System

Upgrade your warehouse's storage and organization by implementing a racking system. With horizontal rows and multiple levels, this solution optimizes space and product arrangement. Not only will you efficiently manage your storage area, but also take your productivity to the next level.

MINI RACKING

Ideal for light, bulky applications, this system follows the End Frame and Beam principles but with smaller section sizes and thicknesses. This results in a reduction of material content and costs.

ADDITIONAL PRODUCTS & SERVICES

Additional value-added products and services:

Forklift Refurbishment

Forklift Service, Repairs & Maintenance

Forklift Parts & Spares

New Electric Forklift Batteries (Lead Acid & Lithium) Plus Installation

Weekly/ monthly Maintenance On Lead Acid Batteries

New Wooden Pallets

Forklift Tyres Plus Onsite Installation

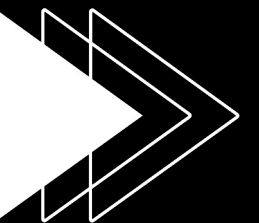

MAINTENANCE SOLUTIONS

We look at the big picture: Our preventative maintenance plans, scheduled service repairs with readily available spares, and the advice of our technicians will make sure you get the most out of your product.
