

AN AIR®
EXTREME

3 LAYER EXTREME SOLID TYRE

Anair premium plus extreme solid tyre has proven to be a market leader in comparison to any opposition brand. This is the most reliable and dependable tyre at any price point.

Manufactured under ISO 9001 Quality Assurance standards; embossed on the sidewall of the tyre.

- ✧ Low rolling resistance and a larger tread layer provides an extremely low cost per hour benefit
- ✧ Manufactured using exceptionally high premium rubber compounds
- ✧ Designed for long distance, high heat build-up and abrasive applications
- ✧ Wear, tear and cut resistant
- ✧ For use in 24 hour applications
- ✧ A centre layer expels heat build-up and also provides additional ride comfort for the operator and also reduces overall wear and tear on the forklift truck
- ✧ The cushion layer together with our unique extra wide S305 tread profile provides more comfort, additional stability and longer life compared to competitors
- ✧ Steel creel bead wires in the base layer to eliminate slippage on the rim and increase safety
- ✧ Full manufacturers guarantee
- ✧ Available in standard, clip lock, non marking and non marking clip lock
